Thanks Brackie.

I just put the acknowledgements together today, I think everything I could extract from the TOPMed website is there (attached).

Best,
Tamar

Tamar,

Nice paper. As the Amish are represented by Jeff O'Connell and Grace, I do not need included as a co-author. Do you have the study-specific acknowledgments for the Amish?

Brackie

Hi Brackie,

Attached is the manuscript.

Dear Grace,

I hope this email finds you well.
I circulated this manuscript draft in Sept 30, and you haven't responded. I believe that you did help us with the sleep data from Amish. While I am hoping to get the sleep duration manuscript out at some point, it seems like it will take a while. Please let me know if you would like to be a co-author on this manuscript.

Thank you,
Tamar

Dear all,

I'm attaching a draft manuscript "BinomiRare: A carriers-only test for association of rare genetic variants with a disease for mixed models and any case-control proportion" corresponding to TOPMed proposal #4549.

Please review and return your comments by October 14. Including, please check your name, add your affiliation (please don't use numbers, use your initial instead, see Han Chen's affiliations as an example, we will add numbers later). Also review the "authors contribution statement" and edit as appropriate, I may have forgotten some of you.

Also: does anyone know what are the contact details of Mary Cushman? She is a co-author but I don't know if she worked on the VTE or stroke dataset, and could not find her on the TOPMed website directory.

Finally, people that I don't hear from by October 14 ("hearing from" may include letting me know that you need more time) will be removed from the manuscript.

Thank you for your collaboration and helping push this along in a timely manner,

Tamar
