Tet - you have the green light from geneSTAR to submit. However, there are a few pending minor issues - please see message from Lisa, below. And my affiliation needs to be updated as well.

Thanks and great work!  
Rasika

The paper looks great. A few edits needed for GeneSTAR on Supp Table 4 - acknowledgements, sequencing centers, and sequencing funding (changed on the google drive, also attached). Also, I think your affiliation should be changed to 24 (DOM) to match Lew's and mine, rather than 6 (Biostats) as it currently is, for Margaret.  
Lisa
