Hi Jenn and Addison,

I've added the additional acknowledgements text from Addison to the manuscript. I've also included the omics support tables in Supplementary Information 2 (attached) and added Genestar acknowledgements to Supplementary Information 1 (attached).

As for other updates:

1. The manuscript is now under review from the MESA P&P
2. We've requested the SAPPHIRE_asthma dataset through the TOPMed website and have reached out to Keoki Williams regarding study specific review.

Thanks,

Josh
