Dear Adrienne,

Nice job on the manuscript. SOL does not have any comments, you are free to submit, good luck.

Robert

Dear Dr. Kaplan,

I am submitting the following TOPMed manuscript for review by HCHS/SOL. All co-authors have reviewed the manuscript and approve of it. The paper details the process that the TOPMed DCC used to harmonize phenotypes across 17 different TOPMed studies, one of which was HCHS/SOL. Please let me know when the manuscript has been approved, or if any changes are requested.

Best,
Adrienne Stilp
